

PAWEŁ SZELIGA

JUNIOR FULL-STACK DEVELOPER

SKILLS

- React & TypeScript
- Python
- C# / ASP.NET Core
- Java
- PostgreSQL / MS SQL Server
- REST APIs
- Git & Docker
- Agile teamwork

EDUCATION

Applied Computer Science
Warsaw University of Technology
2026 — Present

B.Sc. in Computer Science
Polish-Japanese Academy
of Information Technology
2022 — 2026

LANGUAGES

- Polish — native
- English — B2

SUMMARY

Computer Science graduate (B.Sc.) open to junior / graduate developer roles. Comfortable moving between frontend and backend — React and TypeScript on one side, C#/.NET and Python on the other, with relational databases underneath. Six months as a software intern at Veolia CUW on real client-facing projects, plus 12+ personal and academic builds.

EXPERIENCE

○ Software Development Intern

Veolia CUW — ORID (Robotization & Digitalization)

2026 — 6-month internship

- Internship carried out mainly in Python — process automations and web-scraping modules.
- Built 10 scraping modules pulling data from external websites, significantly cutting the time the team spent manually searching sites.
- Built an operational app in AppSheet and a full-stack application — a calculator tool, currently pending deployment, aimed at growing the client base.
- First exposure to production code, code review, and deadlines affecting real users.

○ Audio-Video Technician

JSK

3 years

- Set up and operated live AV systems for conferences.
- Troubleshot hardware and software issues in real time, under tight deadlines.

○ Academic & Independent Software Projects

Solo and team-built

2022 — 2026

- Designed and built 12+ projects — web apps, a REST API in ASP.NET Core, machine learning, and games.
- An ML-based image classifier and a neural network built from scratch in NumPy.
- Worked in small teams using Git, task tracking, and code review.

SELECTED PROJECTS

Polish Summits Library

Full-stack app for cataloguing Polish mountain summits — built to help users track their own progress conquering them.

React · C# · MS SQL Server

Dog Breed Detector

CNN classifier recognizing 120 dog breeds on the Stanford Dogs Dataset (20,000+ images), with high classification accuracy.

Python · CNN · Stanford Dogs Dataset

Dental Appointment System

Engineering thesis project: appointment booking with no human factor involved, minimizing registration time — aimed at growing the clinic's client base.

React · TypeScript · SQL Server

Portfolio

Single-page animated portfolio, bilingual, with light/dark theming.

React · TypeScript · Framer Motion
